SUBJECT INDEX

Advection
Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Agricultural watersheds
Another Look at SCS-CN Method, Surendra Kumar Mishra and Vijay P. Singh, HE July 99, p257-264.

Analytical techniques
Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Approximation methods
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Aquifers
Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Seepage Face Modeling for a Large-Diameter Well in an Unconfined Aquifer, C. S. P. Ojha and V. Gopal, HE July 99, p275-279.

Simulation of Spring Management with Quasi-Aggregated Model, Eugenio Sanz Pérez, HE Jan. 99, p77-79.

Areal
Comparing Mean Areal Precipitation Estimates from NEXRAD and Rain Gauge Networks, Dennis Johnson, Michael Smith, Victor Koren and Bryce Finnerty, HE Apr. 99, p117-124.

Arid lands
Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, Pedro C. Fernández, Sergio Fattorelli, Sara Rodríguez and Luis Fornero, HE Oct. 99, p317-325.

Artificial recharge
Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, Herman Bouwer, P.E., Jennifer T. Back and James M. Oliver, HE Oct. 99, p350-357.

Automation
Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Basins
Effects of Unsaturated Zone on Ground-Water Mounding, D. M. Sumner, D. E. Rolston and M. A. Mariño, HE Jan. 99, p65-69.

Boundaries
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Calibration
Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Catchments
Regional Flood Formulas for Seven Subzones of Zone 3 of India, Rakesh Kumar, R. D. Singh and S. M. Seth, HE July 99, p240-244.

Chaos
Singapore Rainfall Behavior: Chaotic? Bellie Sivakumar, Shie-Yui Liong, Chih-Young Liaw and Kok-Kwang Phoon, HE Jan. 99, p38-48.

Climatology
Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Columbia River
Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Comparative studies
Comparison of Precipitation Catch between Nine Mesasuring Systems, Clayton L. Hanson, Gregory L. Johnson and Albert Rango, HE Jan. 99, p70-71.

Computation
Another Look at SCS-CN Method, Surendra Kumar Mishra and Vijay P. Singh, HE July 99, p257-264.

Contaminants
Finite-Element Method for Contaminant Transport in Unsaturated Soils, Xikui Li, Serge Cescotto and Hywel R. Thomas, HE July 99, p265-274.

Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Study of Parallel Computation for Ground Water Solute Transport, Whey-Fone Tsai, Cherng-Yeu Shen, Hsueh-Horng Fu and Chia-Chen Kou, HE Jan. 99, p49-56.

Convection
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Coordinates
Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, Seann M. Reed and David R. Maidment, HE Apr. 99, p174-182.

Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Data handling
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.

Depth
Regional Analysis of Rainfall-Depth-Duration Equation for South Italy, Vito Ferro and Paolo Porto, HE Oct. 99, p326-336.

Design storms
Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Diffusion
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Parking Lot Storage Modeling using Diffusion Waves, Victor M. Ponce and Amy C. Klabunde, HE Oct. 99, p371-376.

Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Digital mapping
Definition and Connection of Hydrologic Elements Using Geographic Data, Ferdinand L. Hellweger and David R. Maidment, HE Jan. 99, p10-18.

Digital techniques
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Discharge
Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Simulation of Spring Management with Quasi-Aggregated Model, Eugenio Sanz Pérez, HE Jan. 99, p77-79.

Discharge measurement
Treatment of Zeroes in Tail Modeling of Low Flows, S. Rocky Durrans, Taha B. M. J. Ouarda, Peter F. Rasmussen and Bernard Bobée, HE Jan. 99, p19-27.

Dispersion
Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Drainage
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Two-Layer Model of Near-Surface Soil Drying for Time-Continuous Hydrologic Simulations, Stefano Orlandini, HE Apr. 99, p91-99.

Droughts
Return Period and Risk of Hydrologic Events. II: Applications, Bonifacio Fernández and José D. Salas, HE Oct. 99, p308-316.

Elevation
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Error analysis
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.

Estimates
GEV-PWM Model for Distribution of Minimum Flows, B. Önöz and M. Bayazit, HE July 99, p289-292.

Estimation
Comparison of Hurst Exponent Estimates in Hydrometeorological Time Series, A. Ramachandra Rao and D. Bhattacharya, HE July 99, p225-231.

Evaporation
Two-Layer Model of Near-Surface Soil Drying for Time-Continuous Hydrologic Simulations, Stefano Orlandini, HE Apr. 99, p91-99.

Failures
Return Period and Risk of Hydrologic Events. I: Mathematical Formulation, Bonifacio Fernández and José D. Salas, HE Oct. 99, p297-307.

Return Period and Risk of Hydrologic Events. II: Applications, Bonifacio Fernández and José D. Salas, HE Oct. 99, p308-316.

Finite differences
Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Finite element method
Finite-Element Method for Contaminant Transport in Unsaturated Soils, Xikui Li, Serge Cescotto and Hywel R. Thomas, HE July 99, p265-274.

Flood frequency
Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.

Regional Flood Formulas for Seven Subzones of Zone 3 of India, Rakesh Kumar, R. D. Singh and S. M. Seth, HE July 99, p240-244.

Flood hydrology
Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Reverse Routing of Flood Hydrographs Using Level Pool Routing, Christopher Zoppou, HE Apr. 99, p184-188.

Flooding
Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Floodwaves
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Hysteresis-Based Flood Wave Analysis, Surendra Kumar Mishra and Vijay P. Singh, HE Oct. 99, p358-365.

Flow
Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.

Stochastic Procedure for Generating Seasonal Flows, Chavalit Chaleeraktrakoon, HE Oct. 99, p337-343.

Flow characteristics
Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.

Flow patterns
Stochastic Procedure for Generating Seasonal Flows, Chavalit Chaleeraktrakoon, HE Oct. 99, p337-343.

SUBJECT INDEX

Advection
Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Agricultural watersheds
Another Look at SCS-CN Method, Surendra Kumar Mishra and Vijay P. Singh, HE July 99, p257-264.

Analytical techniques
Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Approximation methods
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Aquifers
Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Seepage Face Modeling for a Large-Diameter Well in an Unconfined Aquifer, C. S. P. Ojha and V. Gopal, HE July 99, p275-279.

Simulation of Spring Management with Quasi-Aggregated Model, Eugenio Sanz Pérez, HE Jan. 99, p77-79.

Areal
Comparing Mean Areal Precipitation Estimates from NEXRAD and Rain Gauge Networks, Dennis Johnson, Michael Smith, Victor Koren and Bryce Finnerty, HE Apr. 99, p117-124.

Arid lands
Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, Pedro C. Fernández, Sergio Fattorelli, Sara Rodríguez and Luis Fornero, HE Oct. 99, p317-325.

Artificial recharge
Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, Herman Bouwer, P.E., Jennifer T. Back and James M. Oliver, HE Oct. 99, p350-357.

Automation
Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Basins
Effects of Unsaturated Zone on Ground-Water Mounding, D. M. Sumner, D. E. Rolston and M. A. Mariño, HE Jan. 99, p65-69.

Boundaries
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Calibration
Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Catchments
Regional Flood Formulas for Seven Subzones of Zone 3 of India, Rakesh Kumar, R. D. Singh and S. M. Seth, HE July 99, p240-244.

Chaos
Singapore Rainfall Behavior: Chaotic? Bellie Sivakumar, Shie-Yui Liong, Chih-Young Liaw and Kok-Kwang Phoon, HE Jan. 99, p38-48.

Climatology
Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Columbia River
Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Comparative studies
Comparison of Precipitation Catch between Nine Mesasuring Systems, Clayton L. Hanson, Gregory L. Johnson and Albert Rango, HE Jan. 99, p70-71.

Computation
Another Look at SCS-CN Method, Surendra Kumar Mishra and Vijay P. Singh, HE July 99, p257-264.

Contaminants
Finite-Element Method for Contaminant Transport in Unsaturated Soils, Xikui Li, Serge Cescotto and Hywel R. Thomas, HE July 99, p265-274.

Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Study of Parallel Computation for Ground Water Solute Transport, Whey-Fone Tsai, Cherng-Yeu Shen, Hsueh-Horng Fu and Chia-Chen Kou, HE Jan. 99, p49-56.

Convection
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Coordinates
Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, Seann M. Reed and David R. Maidment, HE Apr. 99, p174-182.

Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Data handling
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.

Depth
Regional Analysis of Rainfall-Depth-Duration Equation for South Italy, Vito Ferro and Paolo Porto, HE Oct. 99, p326-336.

Design storms
Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Diffusion
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Parking Lot Storage Modeling using Diffusion Waves, Victor M. Ponce and Amy C. Klabunde, HE Oct. 99, p371-376.

Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Digital mapping
Definition and Connection of Hydrologic Elements Using Geographic Data, Ferdinand L. Hellweger and David R. Maidment, HE Jan. 99, p10-18.

Digital techniques
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Discharge
Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Simulation of Spring Management with Quasi-Aggregated Model, Eugenio Sanz Pérez, HE Jan. 99, p77-79.

Discharge measurement
Treatment of Zeroes in Tail Modeling of Low Flows, S. Rocky Durrans, Taha B. M. J. Ouarda, Peter F. Rasmussen and Bernard Bobée, HE Jan. 99, p19-27.

Dispersion
Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Drainage
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Two-Layer Model of Near-Surface Soil Drying for Time-Continuous Hydrologic Simulations, Stefano Orlandini, HE Apr. 99, p91-99.

Droughts
Return Period and Risk of Hydrologic Events. II: Applications, Bonifacio Fernández and José D. Salas, HE Oct. 99, p308-316.

Elevation
Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Error analysis
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.

Estimates
GEV-PWM Model for Distribution of Minimum Flows, B. Önöz and M. Bayazit, HE July 99, p289-292.

Estimation
Comparison of Hurst Exponent Estimates in Hydrometeorological Time Series, A. Ramachandra Rao and D. Bhattacharya, HE July 99, p225-231.

Evaporation
Two-Layer Model of Near-Surface Soil Drying for Time-Continuous Hydrologic Simulations, Stefano Orlandini, HE Apr. 99, p91-99.

Failures
Return Period and Risk of Hydrologic Events. I: Mathematical Formulation, Bonifacio Fernández and José D. Salas, HE Oct. 99, p297-307.

Return Period and Risk of Hydrologic Events. II: Applications, Bonifacio Fernández and José D. Salas, HE Oct. 99, p308-316.

Finite differences
Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Finite element method
Finite-Element Method for Contaminant Transport in Unsaturated Soils, Xikui Li, Serge Cescotto and Hywel R. Thomas, HE July 99, p265-274.

Flood frequency
Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.

Regional Flood Formulas for Seven Subzones of Zone 3 of India, Rakesh Kumar, R. D. Singh and S. M. Seth, HE July 99, p240-244.

Flood hydrology
Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Reverse Routing of Flood Hydrographs Using Level Pool Routing, Christopher Zoppou, HE Apr. 99, p184-188.

Flooding
Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Floodwaves
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Hysteresis-Based Flood Wave Analysis, Surendra Kumar Mishra and Vijay P. Singh, HE Oct. 99, p358-365.

Flow
Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.

Stochastic Procedure for Generating Seasonal Flows, Chavalit Chaleeraktrakoon, HE Oct. 99, p337-343.

Flow characteristics
Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.

Flow patterns
Stochastic Procedure for Generating Seasonal Flows, Chavalit Chaleeraktrakoon, HE Oct. 99, p337-343.

Forecasting

Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.

Within-Season updating of Seasonal Forecast of Lake Kinneret Inflow, Isabela Shentsis and Arie Ben-Zvi, HE Oct. 99, p381-385.

Forests

Modeling Surface and Subsurface Runoff in a Forested Watershed, David H. Axworthy and Bryan W. Karney, HE Apr. 99, p165-173.

Frequency analysis

Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.

Gaging stations

Treatment of Zeroes in Tail Modeling of Low Flows, S. Rocky Durrans, Taha B. M. J. Ouarda, Peter F. Rasmussen and Bernard Bobée, HE Jan. 99, p19-27.

Geographic information systems

Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, Seann M. Reed and David R. Maidment, HE Apr. 99, p174-182.

Definition and Connection of Hydrologic Elements Using Geographic Data, Ferdinand L. Hellweger and David R. Maidment, HE Jan. 99, p10-18.

Distributed Hydrological Model for Fuji River Basin, Huaxia Yao and Akira Terakawa, HE Apr. 99, p106-116.

Grid systems

Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, Seann M. Reed and David R. Maidment, HE Apr. 99, p174-182.

Ground water

Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, Herman Bouwer, P.E., Jennifer T. Back and James M. Oliver, HE Oct. 99, p350-357.

Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Ground-water flow

Simulation of Spring Management with Quasi-Aggregated Model, Eugenio Sanz Pérez, HE Jan. 99, p77-79.

Uncertainty of One-Dimensional Ground-Water Flow in Strongly Heterogeneous Formations, Hongbin Zhan and Stephen W. Wheatcraft, HE Apr. 99, p152-159.

Ground-water mounding

Effects of Unsaturated Zone on Ground-Water Mounding, D. M. Sumner, D. E. Rolston and M. A. Mariño, HE Jan. 99, p65-69.

Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, Herman Bouwer, P.E., Jennifer T. Back and James M. Oliver, HE Oct. 99, p350-357.

Ground-water pollution

Study of Parallel Computation for Ground Water Solute Transport, Whey-Fone Tsai, Cherng-Yeu Shen, Hsueh-Horng Fu and Chia-Chen Kou, HE Jan. 99, p49-56.

Hydraulic structures

Return Period and Risk of Hydrologic Events. I: Mathematical Formulation, Bonifacio Fernández and José D. Salas, HE Oct. 99, p297-307.

Hydrocarbons

Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Hydrographs

Parking Lot Storage Modeling using Diffusion Waves, Victor M. Ponce and Amy C. Klabunde, HE Oct. 99, p371-376.

Reverse Routing of Flood Hydrographs Using Level Pool Routing, Christopher Zoppou, HE Apr. 99, p184-188.

Use of Similarity Profiles for Computing Surface Runoff over Small Watersheds, Rao S. Govindaraju, R. Morbidelli and C. Corradini, HE Apr. 99, p100-107.

Hydrologic aspects

Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Return Period and Risk of Hydrologic Events. II: Applications, Bonifacio Fernández and José D. Salas, HE Oct. 99, p308-316.

Hydrologic data

Definition and Connection of Hydrologic Elements Using Geographic Data, Ferdinand L. Hellweger and David R. Maidment, HE Jan. 99, p10-18.

Guest Editorial, Anand Prakash, HE Jan. 99, p1.

Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Return Period and Risk of Hydrologic Events. I: Mathematical Formulation, Bonifacio Fernández and José D. Salas, HE Oct. 99, p297-307.

Hydrologic models

Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, Seann M. Reed and David R. Maidment, HE Apr. 99, p174-182.

Definition and Connection of Hydrologic Elements Using Geographic Data, Ferdinand L. Hellweger and David R. Maidment, HE Jan. 99, p10-18.

Distributed Hydrological Model for Fuji River Basin, Huaxia Yao and Akira Terakawa, HE Apr. 99, p106-116.

Evolution of Clark's Unit Graph Method to Spatially Distributed Runoff, Daniel W. Kull and Arlen D. Feldman, HE Jan. 98, p9-19.

Guest Editorial, Anand Prakash, HE Jan. 99, p1.

Modeling Surface and Subsurface Runoff in a Forested Watershed, David H. Axworthy and Bryan W. Karney, HE Apr. 99, p165-173.

Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Two-Layer Model of Near-Surface Soil Drying for Time-Continuous Hydrologic Simulations, Stefano Orlandini, HE Apr. 99, p91-99.

Hydrology

Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Guest Editorial, Anand Prakash, HE Jan. 99, p1.

Hydrometeorology

Comparison of Hurst Exponent Estimates in Hydrometeorological Time Series, A. Ramachandra Rao and D. Bhattacharya, HE July 99, p225-231.

Cumulative Departures Model for Lake Water Fluctuations, Mikdat Kadıoğlu, Zekai Şen and Eşref Batur, HE July 99, p245-250.

Hysteresis

Hysteresis-Based Flood Wave Analysis, Surendra Kumar Mishra and Vijay P. Singh, HE Oct. 99, p358-365.

India

Regional Flood Formulas for Seven Subzones of Zone 3 of India, Rakesh Kumar, R. D. Singh and S. M. Seth, HE July 99, p240-244.

Infiltration

Effects of Unsaturated Zone on Ground-Water Mounding, D. M. Sumner, D. E. Rolston and M. A. Mariño, HE Jan. 99, p65-69.

Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, Herman Bouwer, P.E., Jennifer T. Back and James M. Oliver, HE Oct. 99, p350-357.

Runoff in Shallow Soils under Laboratory Conditions, Ana P. Baros, David Knapton, M. C. Wang and C. Y. Kuo, HE Jan. 99, p28-37.

Infiltration rate

Determination of Optimal Loss Rate Parameters and Unit Hydrograph, T. Devi Prasad, Rajiv Gupta and Satya Prakash, HE Jan. 99, p83-87.

Inflow

Reverse Routing of Flood Hydrographs Using Level Pool Routing, Christopher Zoppou, HE Apr. 99, p184-188.

Within-Season updating of Seasonal Forecast of Lake Kinneret Inflow, Isabela Shentsis and Arie Ben-Zvi, HE Oct. 99, p381-385.

Integrated systems

Evolution of Clark's Unit Graph Method to Spatially Distributed Runoff, Daniel W. Kull and Arlen D. Feldman, HE Jan. 98, p9-19.

Israel

Within-Season updating of Seasonal Forecast of Lake Kinneret Inflow, Isabela Shentsis and Arie Ben-Zvi, HE Oct. 99, p381-385.

Italy

Regional Analysis of Rainfall-Depth-Duration Equation for South Italy, Vito Ferro and Paolo Porto, HE Oct. 99, p326-336.

Kalman filter

Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.

TANK Model Using Kalman Filter, Y. H. Lee and V. P. Singh, HE Oct. 99, p344-349.

Kinematic wave theory

Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Kinematics

Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.

Kriging

Geostatistical Applications in Ground-Water Modeling in South-Central Kansas, Tain-Shing Ma, Marios Sophocleous and Yun-Sheng Yu, HE Jan. 99, p57-64.

Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Laboratory tests

Runoff in Shallow Soils under Laboratory Conditions, Ana P. Baros, David Knapton, M. C. Wang and C. Y. Kuo, HE Jan. 99, p28-37.

Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Lakes

Cumulative Departures Model for Lake Water Fluctuations, Mikdat Kadıoğlu, Zekai Şen and Eşref Batur, HE July 99, p245-250.

Within-Season updating of Seasonal Forecast of Lake Kinneret Inflow, Isabela Shentsis and Arie Ben-Zvi, HE Oct. 99, p381-385.

Linear programming

Determination of Optimal Loss Rate Parameters and Unit Hydrograph, T. Devi Prasad, Rajiv Gupta and Satya Prakash, HE Jan. 99, p83-87.

Linear systems

Single-Storm Runoff Analysis Using Z-Transform, C. S. P. Ojha, K. K. Singh and D. V. S. Verma, HE Jan. 99, p80-82.

Low flow

GEV-PWM Model for Distribution of Minimum Flows, B. Önöz and M. Bayazit, HE July 99, p289-292.

Treatment of Zeroes in Tail Modeling of Low Flows, S. Rocky Durrans, Taha B. M. J. Ouarda, Peter F. Rasmussen and Bernard Bobée, HE Jan. 99, p19-27.

Measurement

Comparing Mean Areal Precipitation Estimates from NEXRAD and Rain Gauge Networks, Dennis Johnson, Michael Smith, Victor Koren and Bryce Finnerty, HE Apr. 99, p117-124.

Comparison of Precipitation Catch between Nine Mesasuring Systems, Clayton L. Hanson, Gregory L. Johnson and Albert Rango, HE Jan. 99, p70-71.

TANK Model Using Kalman Filter, Y. H. Lee and V. P. Singh, HE Oct. 99, p344-349.

Measuring instruments

Comparison of Precipitation Catch between Nine Mesasuring Systems, Clayton L. Hanson, Gregory L. Johnson and Albert Rango, HE Jan. 99, p70-71.

Meteorological data

Distributed Hydrological Model for Fuji River Basin, Huaxia Yao and Akira Terakawa, HE Apr. 99, p106-116.

Model accuracy

Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.

Modeling
Approximate Convection-Diffusion Equations, Muthiah Perumal and Kittur G. Ranga Raju, HE Apr. 99, p160-164.
Rainfall-Runoff Modeling Using Artificial Neural Networks, A. Sezin Tokar and Peggy A. Johnson, HE July 99, p232-239.
Seepage Face Modeling for a Large-Diameter Well in an Unconfined Aquifer, C. S. P. Ojha and V. Gopal, HE July 99, p275-279.
Treatment of Zeroes in Tail Modeling of Low Flows, S. Rocky Durrans, Taha B. M. J. Ouarda, Peter F. Rasmussen and Bernard Bobée, HE Jan. 99, p19-27.

Models
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.
TANK Model Using Kalman Filter, Y. H. Lee and V. P. Singh, HE Oct. 99, p344-349.

Moments
Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Monitoring
Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Monte Carlo method
Uncertainty of One-Dimensional Ground-Water Flow in Strongly Heterogeneous Formations, Hongbin Zhan and Stephen W. Wheatcraft, HE Apr. 99, p152-159.

Neural networks
Rainfall-Runoff Modeling Using Artificial Neural Networks, A. Sezin Tokar and Peggy A. Johnson, HE July 99, p232-239.

Nonaqueous phase liquids
Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Nonlinear analysis
Uncertainty of One-Dimensional Ground-Water Flow in Strongly Heterogeneous Formations, Hongbin Zhan and Stephen W. Wheatcraft, HE Apr. 99, p152-159.

Numerical calculations
Return Period and Risk of Hydrologic Events. I: Mathematical Formulation, Bonifacio Fernández and José D. Salas, HE Oct. 99, p297-307.
Return Period and Risk of Hydrologic Events. II: Applications, Bonifacio Fernández and José D. Salas, HE Oct. 99, p308-316.

Numerical models
Finite-Element Method for Contaminant Transport in Unsaturated Soils, Xikui Li, Serge Cescotto and Hywel R. Thomas, HE July 99, p265-274.
Geostatistical Applications in Ground-Water Modeling in South-Central Kansas, Tain-Shing Ma, Marios Sophocleous and Yun-Sheng Yu, HE Jan. 99, p57-64.

Open channels
Hysteresis-Based Flood Wave Analysis, Surendra Kumar Mishra and Vijay P. Singh, HE Oct. 99, p358-365.

Optimization
Determination of Optimal Loss Rate Parameters and Unit Hydrograph, T. Devi Prasad, Rajiv Gupta and Satya Prakash, HE Jan. 99, p83-87.

Optimization models
Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Overland flow
Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Parallel processing
Study of Parallel Computation for Ground Water Solute Transport, Whey-Fone Tsai, Cherng-Yeu Shen, Hsueh-Horng Fu and Chia-Chen Kou, HE Jan. 99, p49-56.

Parameters
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.
Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.
Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Parking lots
Parking Lot Storage Modeling using Diffusion Waves, Victor M. Ponce and Amy C. Klabunde, HE Oct. 99, p371-376.

Peak floods
Regional Flood Formulas for Seven Subzones of Zone 3 of India, Rakesh Kumar, R. D. Singh and S. M. Seth, HE July 99, p240-244.

Planning
Guest Editorial, Anand Prakash, HE Jan. 99, p1.

Precipitation
Comparing Mean Areal Precipitation Estimates from NEXRAD and Rain Gauge Networks, Dennis Johnson, Michael Smith, Victor Koren and Bryce Finnerty, HE Apr. 99, p117-124.
Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, Seann M. Reed and David R. Maidment, HE Apr. 99, p174-182.
Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, Pedro C. Fernández, Sergio Fattorelli, Sara Rodríguez and Luis Fornero, HE Oct. 99, p317-325.

Predictions
Singapore Rainfall Behavior: Chaotic? Bellie Sivakumar, Shie-Yui Liong, Chih-Young Liaw and Kok-Kwang Phoon, HE Jan. 99, p38-48.

Probabilistic models
GEV-PWM Model for Distribution of Minimum Flows, B. Önöz and M. Bayazit, HE July 99, p289-292.

Probability distribution
GEV-PWM Model for Distribution of Minimum Flows, B. Önöz and M. Bayazit, HE July 99, p289-292.
Within-Season updating of Seasonal Forecast of Lake Kinneret Inflow, Isabela Shentsis and Arie Ben-Zvi, HE Oct. 99, p381-385.

Profiles
Use of Similarity Profiles for Computing Surface Runoff over Small Watersheds, Rao S. Govindaraju, R. Morbidelli and C. Corradini, HE Apr. 99, p100-107.

Radar
Comparing Mean Areal Precipitation Estimates from NEXRAD and Rain Gauge Networks, Dennis Johnson, Michael Smith, Victor Koren and Bryce Finnerty, HE Apr. 99, p117-124.

Rain gages
Comparing Mean Areal Precipitation Estimates from NEXRAD and Rain Gauge Networks, Dennis Johnson, Michael Smith, Victor Koren and Bryce Finnerty, HE Apr. 99, p117-124.
Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, Pedro C. Fernández, Sergio Fattorelli, Sara Rodríguez and Luis Fornero, HE Oct. 99, p317-325.

Rainfall
Another Look at SCS-CN Method, Surendra Kumar Mishra and Vijay P. Singh, HE July 99, p257-264.
Coordinate Transformations for Using NEXRAD Data in GIS-Based Hydrologic Modeling, Seann M. Reed and David R. Maidment, HE Apr. 99, p174-182.
Runoff in Shallow Soils under Laboratory Conditions, Ana P. Baros, David Knapton, M. C. Wang and C. Y. Kuo, HE Jan. 99, p28-37.
Singapore Rainfall Behavior: Chaotic? Bellie Sivakumar, Shie-Yui Liong, Chih-Young Liaw and Kok-Kwang Phoon, HE Jan. 99, p38-48.
Within-Season updating of Seasonal Forecast of Lake Kinneret Inflow, Isabela Shentsis and Arie Ben-Zvi, HE Oct. 99, p381-385.

Rainfall duration
Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.
Regional Analysis of Rainfall-Depth-Duration Equation for South Italy, Vito Ferro and Paolo Porto, HE Oct. 99, p326-336.

Rainfall frequency
Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, Pedro C. Fernández, Sergio Fattorelli, Sara Rodríguez and Luis Fornero, HE Oct. 99, p317-325.
Regional Analysis of Rainfall-Depth-Duration Equation for South Italy, Vito Ferro and Paolo Porto, HE Oct. 99, p326-336.

Rainfall-runoff relationships
Determination of Optimal Loss Rate Parameters and Unit Hydrograph, T. Devi Prasad, Rajiv Gupta and Satya Prakash, HE Jan. 99, p83-87.
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.
Evolution of Clark's Unit Graph Method to Spatially Distributed Runoff, Daniel W. Kull and Arlen D. Feldman, HE Jan. 98, p9-19.
Rainfall-Runoff Modeling Using Artificial Neural Networks, A. Sezin Tokar and Peggy A. Johnson, HE July 99, p232-239.
Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.
Single-Storm Runoff Analysis Using Z-Transform, C. S. P. Ojha, K. K. Singh and D. V. S. Verma, HE Jan. 99, p80-82.
TANK Model Using Kalman Filter, Y. H. Lee and V. P. Singh, HE Oct. 99, p344-349.

Real-time programming
Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.

Recharge basins
Effects of Unsaturated Zone on Ground-Water Mounding, D. M. Sumner, D. E. Rolston and M. A. Mariño, HE Jan. 99, p65-69.

Recursive functions
Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.

Regional analysis
Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, Pedro C. Fernández, Sergio Fattorelli, Sara Rodríguez and Luis Fornero, HE Oct. 99, p317-325.
Regional Analysis of Rainfall-Depth-Duration Equation for South Italy, Vito Ferro and Paolo Porto, HE Oct. 99, p326-336.
Regional Flood Formulas for Seven Subzones of Zone 3 of India, Rakesh Kumar, R. D. Singh and S. M. Seth, HE July 99, p240-244.

Reliability analysis
Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.

Research
Guest Editorial, Anand Prakash, HE Jan. 99, p1.

Reservoirs
Reverse Routing of Flood Hydrographs Using Level Pool Routing, Christopher Zoppou, HE Apr. 99, p184-188.
Stochastic Procedure for Generating Seasonal Flows, Chavalit Chaleeraktrakoon, HE Oct. 99, p337-343.

Return flow
Return Period and Risk of Hydrologic Events. I: Mathematical Formulation, Bonifacio Fernández and José D. Salas, HE Oct. 99, p297-307.
Return Period and Risk of Hydrologic Events. II: Applications, Bonifacio Fernández and José D. Salas, HE Oct. 99, p308-316.

Risk analysis
Return Period and Risk of Hydrologic Events. I: Mathematical Formulation, Bonifacio Fernández and José D. Salas, HE Oct. 99, p297-307.

River basins
Distributed Hydrological Model for Fuji River Basin, Huaxia Yao and Akira Terakawa, HE Apr. 99, p106-116.
TANK Model Using Kalman Filter, Y. H. Lee and V. P. Singh, HE Oct. 99, p344-349.

River flow
Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.

Routing

Reverse Routing of Flood Hydrographs Using Level Pool Routing, Christopher Zoppou, HE Apr. 99, p184-188.

Runoff

Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Modeling Hydrologic and Water Quality Responses to Grass Waterways, Allen Hjelmfelt and Menghua Wang, HE July 99, p251-256.

Runoff in Shallow Soils under Laboratory Conditions, Ana P. Baros, David Knapton, M. C. Wang and C. Y. Kuo, HE Jan. 99, p28-37.

Runoff forecasting

Rainfall-Runoff Modeling Using Artificial Neural Networks, A. Sezin Tokar and Peggy A. Johnson, HE July 99, p232-239.

Salt water-freshwater interfaces

Geostatistical Applications in Ground-Water Modeling in South-Central Kansas, Tain-Shing Ma, Marios Sophocleous and Yun-Sheng Yu, HE Jan. 99, p57-64.

Seasonal variations

Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Stochastic Procedure for Generating Seasonal Flows, Chavalit Chaleeraktrakoon, HE Oct. 99, p337-343.

Within-Season updating of Seasonal Forecast of Lake Kinneret Inflow, Isabela Shentsis and Arie Ben-Zvi, HE Oct. 99, p381-385.

Seepage

Seepage Face Modeling for a Large-Diameter Well in an Unconfined Aquifer, C. S. P. Ojha and V. Gopal, HE July 99, p275-279.

Sewers

Recursive System Identification for Real-Time Sewer Flow Forecasting, Alexander Gelfan, Pavel Hajda and Vladimir Novotny, HE July 99, p280-287.

Similitude

Use of Similarity Profiles for Computing Surface Runoff over Small Watersheds, Rao S. Govindaraju, R. Morbidelli and C. Corradini, HE Apr. 99, p100-107.

Snowfall

Comparison of Precipitation Catch between Nine Mesasuring Systems, Clayton L. Hanson, Gregory L. Johnson and Albert Rango, HE Jan. 99, p70-71.

Soil stability

Modeling Hydrologic and Water Quality Responses to Grass Waterways, Allen Hjelmfelt and Menghua Wang, HE July 99, p251-256.

Soil water

Two-Layer Model of Near-Surface Soil Drying for Time-Continuous Hydrologic Simulations, Stefano Orlandini, HE Apr. 99, p91-99.

Soils

Runoff in Shallow Soils under Laboratory Conditions, Ana P. Baros, David Knapton, M. C. Wang and C. Y. Kuo, HE Jan. 99, p28-37.

Soils, unsaturated

Finite-Element Method for Contaminant Transport in Unsaturated Soils, Xikui Li, Serge Cescotto and Hywel R. Thomas, HE July 99, p265-274.

Solutes

Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Study of Parallel Computation for Ground Water Solute Transport, Whey-Fone Tsai, Cherng-Yeu Shen, Hsueh-Horng Fu and Chia-Chen Kou, HE Jan. 99, p49-56.

Sorption

Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Spatial analysis

Use of Similarity Profiles for Computing Surface Runoff over Small Watersheds, Rao S. Govindaraju, R. Morbidelli and C. Corradini, HE Apr. 99, p100-107.

Spatial data

Distributed Hydrological Model for Fuji River Basin, Huaxia Yao and Akira Terakawa, HE Apr. 99, p106-116.

Evolution of Clark's Unit Graph Method to Spatially Distributed Runoff, Daniel W. Kull and Arlen D. Feldman, HE Jan. 98, p9-19.

Statistical distributions

Halphen Distribution System. I: Mathematical and Statistical Properties, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p189-199.

Halphen Distribution System. II: Parameter and Quantile Estimation, L. Perreault, B. Bobée and P. F. Rasmussen, HE July 99, p200-208.

Steady state

Cumulative Departures Model for Lake Water Fluctuations, Mikdat Kadıoğlu, Zekai Şen and Eşref Batur, HE July 99, p245-250.

Stochastic models

Stochastic Procedure for Generating Seasonal Flows, Chavalit Chaleeraktrakoon, HE Oct. 99, p337-343.

Storm runoff

Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Single-Storm Runoff Analysis Using Z-Transform, C. S. P. Ojha, K. K. Singh and D. V. S. Verma, HE Jan. 99, p80-82.

Storms

Regional Analysis of Convective Storms in Arid Zone of Southern Hemisphere, Pedro C. Fernández, Sergio Fattorelli, Sara Rodríguez and Luis Fornero, HE Oct. 99, p317-325.

Stormwater management

Parking Lot Storage Modeling using Diffusion Waves, Victor M. Ponce and Amy C. Klabunde, HE Oct. 99, p371-376.

Streamflow forecasting

Long-Range Streamflow Forecasting Using El Nino-Southern Oscillation Indicators, Thomas C.. Piechota and John A. Dracup, HE Apr. 99, p144-151.

Status of Automatic Calibration for Hydrologic Models: Comparison with Multilevel Expert Calibration, Hoshin Vijai Gupta, Soroosh Sorooshian and Patrice Ogou Yapo, HE Apr. 99, p135-143.

Streams

Treatment of Zeroes in Tail Modeling of Low Flows, S. Rocky Durrans, Taha B. M. J. Ouarda, Peter F. Rasmussen and Bernard Bobée, HE Jan. 99, p19-27.

Subsurface flow

Modeling Surface and Subsurface Runoff in a Forested Watershed, David H. Axworthy and Bryan W. Karney, HE Apr. 99, p165-173.

Surface runoff

Another Look at SCS-CN Method, Surendra Kumar Mishra and Vijay P. Singh, HE July 99, p257-264.

Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Modeling Surface and Subsurface Runoff in a Forested Watershed, David H. Axworthy and Bryan W. Karney, HE Apr. 99, p165-173.

Use of Similarity Profiles for Computing Surface Runoff over Small Watersheds, Rao S. Govindaraju, R. Morbidelli and C. Corradini, HE Apr. 99, p100-107.

Tanks

TANK Model Using Kalman Filter, Y. H. Lee and V. P. Singh, HE Oct. 99, p344-349.

Terrain models

Adaptive Tessellation Method for Creating TINs from GIS Data, E. James Nelson, Norman L. Jones and Russell J. Berrett, HE Jan. 99, p2-9.

Time series analysis

Comparison of Hurst Exponent Estimates in Hydrometeorological Time Series, A. Ramachandra Rao and D. Bhattacharya, HE July 99, p225-231.

Topography

Kinematic Wave Analysis of Sheet Flow Using Topography Fitted Coordinates, T. S. Tisdale, J. M. Hamrick and S. L. Yu, HE Oct. 99, p367-370.

Transport phenomena

Finite-Element Method for Contaminant Transport in Unsaturated Soils, Xikui Li, Serge Cescotto and Hywel R. Thomas, HE July 99, p265-274.

Simplified Expressions for Spatial Moments of Ground-Water Contaminant Plumes, Jeffrey A. Cunningham, Mark N. Goltz and Paul V. Roberts, HE Oct. 99, p377-380.

Solute Transport in Heterogeneous Field, Yili An, Yee-Chung Jin and T. Viraraghavan, HE July 99, p293-296.

Study of Parallel Computation for Ground Water Solute Transport, Whey-Fone Tsai, Cherng-Yeu Shen, Hsueh-Horng Fu and Chia-Chen Kou, HE Jan. 99, p49-56.

Uncertainty analysis

Geostatistical Applications in Ground-Water Modeling in South-Central Kansas, Tain-Shing Ma, Marios Sophocleous and Yun-Sheng Yu, HE Jan. 99, p57-64.

Uncertainty principles

Uncertainty of One-Dimensional Ground-Water Flow in Strongly Heterogeneous Formations, Hongbin Zhan and Stephen W. Wheatcraft, HE Apr. 99, p152-159.

Unit hydrographs

Determination of Optimal Loss Rate Parameters and Unit Hydrograph, T. Devi Prasad, Rajiv Gupta and Satya Prakash, HE Jan. 99, p83-87.

Effect of Input and Parameter Uncertainties in Rainfall-Runoff Simulations, Jan Høybye and Dan Rosbjerg, HE July 99, p214-224.

Evolution of Clark's Unit Graph Method to Spatially Distributed Runoff, Daniel W. Kull and Arlen D. Feldman, HE Jan. 98, p9-19.

Single-Storm Runoff Analysis Using Z-Transform, C. S. P. Ojha, K. K. Singh and D. V. S. Verma, HE Jan. 99, p80-82.

Unsaturated flow

Effects of Unsaturated Zone on Ground-Water Mounding, D. M. Sumner, D. E. Rolston and M. A. Mariño, HE Jan. 99, p65-69.

Urban runoff

Parking Lot Storage Modeling using Diffusion Waves, Victor M. Ponce and Amy C. Klabunde, HE Oct. 99, p371-376.

Vadose zone

Effects of Unsaturated Zone on Ground-Water Mounding, D. M. Sumner, D. E. Rolston and M. A. Mariño, HE Jan. 99, p65-69.

Variability

Singapore Rainfall Behavior: Chaotic? Bellie Sivakumar, Shie-Yui Liong, Chih-Young Liaw and Kok-Kwang Phoon, HE Jan. 99, p38-48.

Vegetative cover

Modeling Hydrologic and Water Quality Responses to Grass Waterways, Allen Hjelmfelt and Menghua Wang, HE July 99, p251-256.

Volume measure

Another Look at SCS-CN Method, Surendra Kumar Mishra and Vijay P. Singh, HE July 99, p257-264.

Waste sites

Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Water balance

Two-Layer Model of Near-Surface Soil Drying for Time-Continuous Hydrologic Simulations, Stefano Orlandini, HE Apr. 99, p91-99.

Water level fluctuations

Cumulative Departures Model for Lake Water Fluctuations, Mikdat Kadıoğlu, Zekai Şen and Eşref Batur, HE July 99, p245-250.

Interpretation of LNAPL Thickness Measurements under Unsteady Conditions, Mustafa M. Aral and Boshu Liao, HE Apr. 99, p125-134.

Water levels

Reverse Routing of Flood Hydrographs Using Level Pool Routing, Christopher Zoppou, HE Apr. 99, p184-188.

Water management

Predicting Infiltration and Ground-Water Mounds for Artificial Recharge, Herman Bouwer, P.E., Jennifer T. Back and James M. Oliver, HE Oct. 99, p350-357.

Simulation of Spring Management with Quasi-Aggregated Model, Eugenio Sanz Pérez, HE Jan. 99, p77-79.

Water quality

Modeling Hydrologic and Water Quality Responses to Grass Waterways, Allen Hjelmfelt and Menghua Wang, HE July 99, p251-256.

Water storage

Parking Lot Storage Modeling using Diffusion Waves, Victor M. Ponce and Amy C. Klabunde, HE Oct. 99, p371-376.

Watershed management

Modeling Hydrologic and Water Quality Responses to Grass Waterways, Allen Hjelmfelt and Menghua Wang, HE July 99, p251-256.

Watersheds

Assessment of Storm Duration for Hydrologic Design, Benjamin Levy and Richard McCuen, HE July 99, p209-213.

Definition and Connection of Hydrologic Elements Using Geographic Data, Ferdinand L. Hellweger and David R. Maidment, HE Jan. 99, p10-18.

Evolution of Clark's Unit Graph Method to Spatially Distributed Runoff, Daniel W. Kull and Arlen D. Feldman, HE Jan. 98, p9-19.

Modeling Surface and Subsurface Runoff in a Forested Watershed, David H. Axworthy and Bryan W. Karney, HE Apr. 99, p165-173.

Use of Similarity Profiles for Computing Surface Runoff over Small Watersheds, Rao S. Govindaraju, R. Morbidelli and C. Corradini, HE Apr. 99, p100-107.

Wave propagation

Hysteresis-Based Flood Wave Analysis, Surendra Kumar Mishra and Vijay P. Singh, HE Oct. 99, p358-365.

Wells

Seepage Face Modeling for a Large-Diameter Well in an Unconfined Aquifer, C. S. P. Ojha and V. Gopal, HE July 99, p275-279.
